

## Merit Injectable (Imidacloprid)

Merit 3 ml is used to control the following:

I. Trees and shrubs (greater than 2" diameter or 6.25" circumference at breast height) For bee-pollinated dicotyledonous trees, application should be post-bloom

A. Pests are adelgids, aphids, Japanese beetle adults, lace bugs, leafhoppers, Leafminers, mealy bugs, psyllids, soft scales, thrips (suppression), whiteflies

**One Merit Injectable microinjection unit per 2-4 inches of cumulative trunk diameter (6.25-12.5 " of circumference) at breast height (54 inches from ground) with space injection holes equidistantly around the circumference of the tree**

B. Armored Scales (suppression), roundheaded borers (including bronze birch borer), pine tip moth, royal palm bug & sawfly larvae

**One Merit Injectable microinjection unit per 2 inches of cumulative trunk diameter (6.25 of circumference) at breast height (54 inches from ground) with space injection holes equidistantly around the circumference of the tree.**

### **Merit Injectable 6 ml is also available for the treatment of Emerald Ash Borer. Call for details!**

The Tree Tech® Microinjection System sets a new standard for economical and environmentally safe tree health care. As traditional methods of applying chemicals and pesticides become less suited for environmentally sensitive uses, particularly in urban areas, the Tree Tech microinjection system continues to gain acceptance and wider use

The Tree Tech® Microinjection System minimized loss of administered solutions to the surrounding environment, while at the same time maximizing their efficacies. Now you can effectively treat your trees with a full line of nationally labeled products. Tree Tech fungicides, insecticides, herbicides, bactericides and nutrients are packaged in cases of 100 microinjection units

Follow label instructions – never leave unattended
