# Vermacompost: Fine Grade

## About Vermacompost-Fine:

- Enhances availability of plant nutrients.
- Increases water holding capacity of the soil, reducing irrigation frequency and increasing stress tolerance during harsh conditions.
- Makes nutrient delivery more efficient over an extended period.
- Delivers robust and diverse microbial populations.
- Accelerates root initiation, establishment and development.
- Vermacompost: Fine Grade is a refined compost product that has been screened with a 3/32" mesh screen

## Application Rates

**Initial Application:** Apply up to 3,500 pounds of Vermacompost:Fine Grade per acre. (80 pounds applied per 1,000 ft<sup>2</sup>.)

**Established Application:** Apply up to 1,750 pounds of Vermacompost: Fine Grade per acre. (40 pounds applied per 1,000 ft<sup>2</sup>.)

**Blending Ratio:** Mix 20% of Vermacompost: Fine Grade to 80% of the native soil or blending material. The 20/80 ratio should be based on weight of the fertilizer and/or soils blended total weight.

**Turf/Golf Greens:** Mix 5% of Vermacompost: Fine Grade to 95% of the native soil or blending material. The 5/95 ratio should be based on weight of the fertilizer and/or soils blended total weight.

**Established Lawn:** Use the Vermacompost: Fine Grade established application rate and apply Vermacompost topically by hand or with a spreader up to four times annually.

**Lawn Installation:** Using a spreader, use the Vermacompost: Fine Grade initial application rate and apply before sod/seeds are planted.

(To winterize your lawn apply Vermacompost: Fine Grade in late Fall using the established application rate).

**Nursery/Greenhouse:** Use Vermacompost: Fine Grade as a top dress application for your existing plants or you can use Vermacompost: Fine Grade as a blended soil medium with existing soil.

**House/Individual Plant:** Use Vermacompost: Fine Grade as the soil medium or you can top dress your plants.
