

Nutri-Cast

A blend of natural fertilizer and organic matter.
An excellent source of slow-release nitrogen,
phosphorus, potassium, and calcium, as well as
nutrient- and water-holding organic matter.

Nutri-cast is an excellent general-purpose
fertilizer which is gentle on plants and safe for
people and pets.

Nutri-Cast

About Nutri-Cast:

- **Nutri-Cast is a granular blend of organic matter and concentrated soil microbes.**
- **It supplies nitrogen-fixing bacteria, which convert nitrogen from the atmosphere into ammonia/ammonium to act as natural nitrogen sources for plants.**
- **It regulates the availability of essential plant nutrients.**
- **Makes chemical nitrogen fertilizers more effective when applied.**

Application Rates

Initial Application: Apply up to 1,750 pounds of Nutri-Cast per acre. (40 pounds applied per 1,000 ft².)

Established Application: Apply up to 875 pounds of Nutri-Cast per acre. (20 pounds applied per 1,000 ft².)

Blending Rate: Mix 20% of Nutri-Cast to 80% of the native soil or blending material. The 20/80 ratio should be based on weight of the fertilizer and/or soils blended total weight.

Turf/Golf Greens: Mix 5% of Nutri-Cast to 95% of the native soil or blending material. The 5/95 ratio should be based on weight of the fertilizer and/or soils blended total weight.

Established Lawn: Use the Nutri-Cast established application rate and apply Nutri-Cast topically by hand or with a spreader up to four times annually.

Lawn Installation: Using a spreader, use the Nutri-Cast initial application rate and apply before sod/seeds are planted.

Nursery/Greenhouse: Use the Nutri-Cast blending application rate with existing soil or other soil medium before planting. With same blend you can top dress your plants with the same blend. Water your plants after applying the blended mix.

House/Individual Plant: Use the Nutri-Cast blending application rate with existing soil or other soil medium before planting. With same blend you can top dress your plants with the same blend. Water your plants after applying the blended mix.

Guaranteed Analysis:

Total Nitrogen (N)..... 2.0%

1.7% **Water Soluble Nitrogen**

0.3% **Water Insoluble Nitrogen**

Available Phosphate (P_2O_5) 3.0%

Soluble Potash (K_2O) 1.0%

Derived from: Fish Hydrolysate (stabilized with phosphoric acid) and Sulfate of Potash.
