

Vermacompost

Vermacompost is a high-quality plant compost. It provides organic matter, which helps the soil hold water and nutrients, and naturally-occurring fungi, which help decompose organic matter in the soil and release soil-bound nutrients.

Vermacompost improves soil health, and the health, vigor and strength of your plants.

Vermacompost

1.0-0.5-0.5

About Vermacompost:

- Vermacompost can be applied as a soil medium, topically, blended with the existing soil, or mixed with other fertilizers.
- Increases water holding capacity of the soil, reducing irrigation frequency and increasing stress tolerance during harsh conditions.
- Makes nutrient delivery more efficient over an extended period.
- Delivers robust and diverse microbial populations.
- Vermacompost can be applied to flowers, fruit, vegetables, ornamentals, turf, tree and vine crops, field crops, row crops, trees, etc.

Application Rates

Initial Application: Apply up to 3,500 pounds of Vermacompost per acre. (80 pounds applied per 1,000 ft².)

Established Application: Apply up to 1,750 pounds of Vermacompost per acre. (40 pounds applied per 1,000 ft².)

Blending Ratio: Mix 20% of Vermacompost to 80% of the native soil or blending material. The 20/80 ratio should be based on weight of the fertilizer and/or soils blended total weight.

Turf: Mix 5% of Vermacompost to 95% of the native soil or blending material. The 5/95 ratio should be based on weight of the fertilizer and/or soils blended total weight.

Established Lawn: Use the Vermacompost established application rate and apply Vermacompost topically by hand or with a spreader up to four times annually.

Lawn Installation: Using a spreader, use the Vermacompost initial application rate and apply before sod/seeds are planted.

(To winterize your lawn apply Vermacompost in late Fall using the established application rate).

Nursery/Greenhouse: Use Vermacompost as a top dress application for your existing plants or you can use Vermacompost as a soil medium.

House/Individual Plant: Use Vermacompost as the soil medium or you can top dress your plants.

Guaranteed Analysis:

Total Nitrogen (N)..... 1.0%

Available Phosphate (P₂O₅)..... 0.5%

Soluble Potash (K₂O)..... 0.5%

Derived from: Composted yard trimmings and recycled food.
