Granular Kelp Meal

Organic Fertilizer

About Granular Kelp Meal:

- Granular Kelp Meal is derived from seaweed from the Atlantic Ocean and Netherlands.
- It's an excellent source of organic matter, nutrients, and micronutrients.
- Granular Kelp Meal builds up the soil and improves water-holding capacity.

Application Rates

Instructions: Add 10% by volume of Granular Kelp Meal to soil or fertilizer. Can be applied topically, blended with the existing soil or mixed with other fertilizers.

Initial Rate: Apply up to 400 pounds of Granular Kelp Meal per acre. (10 pounds applied per 1,000 ft².)

Established Rate: Apply up to 200 pounds of Granular Kelp Meal per acre. (5 pounds applied per 1,000 ft².)

Blending Rate: Mix 10% of Granular Kelp Meal to 90% of the native soil or blending material. The 10/90 ratio should be based on weight of the fertilizer and/or soils blended total weight.

Garden Soil Preparation: Mix 10lb./1000 ft² of Granular Kelp Meal into the top 3 in. of your garden soil in the Spring before planting.

Fruit Trees and Vegetable Gardens: Mix 1-2 cups of Granular Kelp Meal with your garden soil in transplant hole.

Lawn Installation: Spread 10lb/1000 ft² of Granular Kelp Meal over entire area to be seeded and rake in Granular Kelp Meal.

Established Lawns: Sprinkle 10lb/1000 ft² of Granular Kelp Meal over entire lawn surface as a top dressing during Spring and Fall.

Turf: Apply 10 lbs./1000 ft² of Granular Kelp Meal twice a year, topically in the Spring and in the Fall.

Sod: Apply 10 lbs./1000 ft² of Granular Kelp Meal at the time of installation underneath the sod.
